

Key Features

Easy to Use User Interface:

- Quick and easy to learn.
- Features and settings are one or two clicks from anywhere.
- Basic user interface and Expert for advanced users.
- Smart Keyboard
- Large, user-friendly buttons.
- Only available letters are active when entering the first letters of the location being searched.

Contact Navigation:

- You can plan your route to your friends with one click.
- Friends' addresses can also be displayed on the map.

Address Book and Telephone Functions:

- Phone numbers which are stored in POIs can be dialled direct from the navigation software when using a phone capable device.

Global Map Coverage:

- Top quality maps and navigation software that are constantly growing.
- Unique map coverage particularly for Eastern Europe.

POI Search:

- Around GPS position.
- Around destination.
- Along planned route.
- **E.g.** Finding a hotel, iGO My Way 2006 Plus shows you how to reach the nearest hotel by the quickest route.

Automatic Day/Night Mode Switching

- iGO My Way 2006 Plus automatically switches between day and night modes at sunrise and sunset.
- It also offers portrait and landscape screen modes on all NavNGo iGO compatible devices, regardless of the operating system.

Automatic Route Planning

- Once a destination is set, the software will automatically decide which roads to take.

Smart Zoom

- Changes the scale of maps in both 2D and 3D view.
- Automatic zoom to give the user a better view of upcoming manoeuvres.

Precise Voice Commands

- Select from male or female voice guidance in more than 24 languages.

Tunnel Mode

- When the GPS position is lost inside a tunnel, the journey continues on the recommended route.

TMC (Traffic Message Channel) Function

- TMC compatible devices are capable of receiving real-time traffic information while showing heavy traffic, congestion, accidents, road works and various traffic conditions on your navigation screen, helping users to avoid these areas and to arrive in time at their destination.

Speed Cam (POI Warner)

- Speed Cam database contains thousands of fixed and mobile speed cameras within Europe.
- These special POIs are making the navigation experience even better, warning when the user is about to approach a speed camera.
